

Mobile **enricher**

Mobile enricher is a solution provided by enrich IT with a vision to integrate Bar code reading and ERP transactions into one application using Oracle MSCA. Oracle MSCA is part of Oracle e-business suite and is completely integrated with Oracle ERP from receipt to Shipment transactions

Why **enrich IT**

- Our consultants have done multiple successful MSCA implementation
- We have put together a rapid implementation kit to **Go-Live in 4 to 8 weeks**
- Mobile screen customization and Bar code label design tool kit to suite your business needs
- ON-Time delivery with **low cost fixed fee**
- **Complete service** – Hardware selection, Software installation, Mobile server configuration, Application Setups, Customizations and Label print software integration

We can do a free proof of concept by installing and configuring MSCA in your Oracle instance

What is Oracle MSCA

Oracle Mobile Supply Chain Applications (MSCA) enables operators to perform many common warehouse and shop floor transactions and inquiries from any location in the manufacturing facility through the use of hand held radio frequency (RF) devices, Portable data terminals (PDAs), laptops and lift truck mounted RF scanning devices. It provides real-time connectivity to Oracle Applications through simplified built-in user interfaces

Key Benefits

- Increase inventory accuracy through
 - ✓ Bar code scanning
 - ✓ Real time validation
 - ✓ Reduced data entry errors
 - ✓ Tracking by License plate numbers
- Improve operational productivity and reduce cost through
 - ✓ Process automation throughout the supply chain by bar coding
 - ✓ Increased mobility and flexibility
 - ✓ ASN and pay on receipt
- Reduce implementation cost and complexity through
 - ✓ Built-in functionalities into existing oracle e-business suite (Not Bolt-On)
 - ✓ Standards based, hardware neutral platform

We know Oracle MSCA In and Out
